

# MSC Advanced Management Practice and Law

Fostering the hallmark spirit of independent enquiry and enterprise, the School of Architecture continues to build on contemporary research areas of particular strength including environmental analysis, sustainable design, architecture & urban design theory, and lightweight structural design.

## MSc Advanced Management Practice and Law

The course enables students to acquire advanced knowledge and skills in the professional, contractual and management procedures which are necessary to achieve innovative and appropriate architecture, together with a thorough understanding of the role of the professional architect in the total building process. The course can be completed on part-time basis over 18 months.

- Earn and learn – study by distance learning while working in practice
- Delivered via the University's well-established web-based virtual learning environment
- An emphasis on interactive learning and assignments - essays, case studies, web-based e/gaming and the dissertation - providing students with plenty of opportunities to explore topics of interest to them and their employer.
- Learn key management skills to get an edge in the 'business of architecture'
- Stand alone modules provide a flexible approach
- Modules satisfy the CDP requirements of practicing architects
- Designed and delivered by acknowledged experts in the field

### Course content

Core modules:

- Research methodologies & communications
- Law and contract

“Dundee is riding a wave of academic success that league tables such as our own struggle to capture fully. This is one of the finest institutions in Britain where researchers routinely push back the boundaries of knowledge and teachers inspire their charges. The winners are the students lucky enough to study here.”
