under the auspices of UNESCO

Masters LLM Water Law

“With a background in corporate law I decided to take time off to invest in my education and broaden my career opportunities. Coming from Australia, I was aware of the importance of water as a national and global issue. I was looking for a highly regarded course in water law offering breadth and depth, all delivered within a manageable time frame. I got all this and more from the UNESCO centre; integrated water learning offered in a stimulating and truly global environment. A year of great learning and opportunity.”

Ruxandra Lazarescu, LLM Water Law student

Masters (LLM) Water Law

The LLM Water Law is one of two LLM programmes delivered by the IHP-HELP Centre for Water Law, Policy & Science under the auspices of UNESCO. It is delivered in both full-time and part-time modes, and part-time students use a combination of on-campus and online learning. It is also possible to register for a Postgraduate Certificate or Postgraduate Diploma in Water Law. The LLM Water Law allows study of all the relevant areas of water law, as well as a wide range of options in natural resources law, policy and management.

Full-time students begin in January. Part-time students may begin at any time of year. Part-time students attend in the summer to participate in our summer school, where we deliver modules in the three core areas of water law - international water law, comparative national water law, and the regulation of water services - within a wider group of international students and external participants, primarily water resource experts. Students then complete a dissertation, or internship, or for part-time students, a work-based learning project. Full-time students, may complete these on or off campus. This programme is available to students from law or non-law backgrounds, and provides a globally-recognised and rigorous foundation in an area of increasing global importance for locally-managed resources.

Course content

- Induction module, on-campus or by distance learning
- Options in environmental and natural resources law, policy and management
- International water law - the rules applicable to transboundary water resources
- Comparative national water law - the management of water resources within a state
- Regulation of water services - the ownership and regulation of this essential service
- Part-time mode available with blended learning for students already working in the sector
- Options of a dissertation, internship or work-based project

To apply

- Normally, a good Honours degree in a relevant discipline
- IELTS 6.5 or equivalent for applicants whose first language is not English
- For further information see www.dundee.ac.uk/postgraduate/waterlaw or contact the course leader.
