

## registration

Please register before your session at the registration point in Dalhousie – see map overleaf. We will let you know if there has been any changes to the programme and give you any additional information you may need to make the most of your day.

There are two methods of registering on the day. Visitors can self register by bringing their registration document with them, this will arrive with your confirmation booking letter, and submit it at the self registration table, collecting the additional notes sheet which will inform of any changes to the programme. Alternatively you can hand your registration document to staff when you arrive who will inform you of changes which may have taken place and give you the opportunity to ask any questions regarding the day

## making the most of your day

The map over leaf will help you plan your day, showing you the times and location of subjects available to visit. Please check timings and location and try to arrive on time for each session. Academics and students will give presentations or demonstrations about their subject areas. Each session will last for approximately 50 minutes giving you time to travel to your next session.

## health & safety

During your visit to the University, you will enter different environments. Labs and workshops in particular can be dangerous places. Please follow all the instructions given to you including those shown on safety notices. If the fire alarm sounds, please evacuate by the nearest exit and do not re-enter the building until you are told it is safe to do so.

*If you require help or directions during the day, please visit the information points in DUSA or the Tower Building.*
